THE PLACE WHERE **INNOVATION MEETS LOCAL INDUSTRY**

A&T - Automation & Testing: the Manufacturing Industry Exhibition

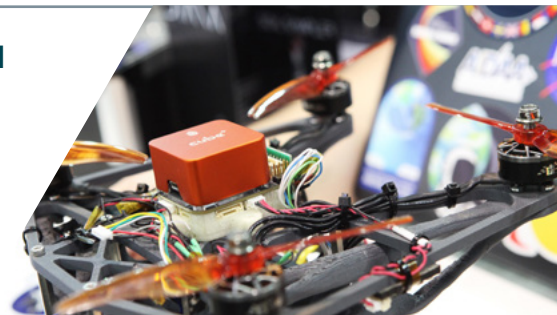

A&T is the exhibition dedicated to **technology solutions for the manufacturing industry and its SMEs**. A format that combines **technology, innovation and expertise**, offering businesses tangible and applicable tools to meet the challenges of growing competition and the digital transition.

TECHNOLOGY

INNOVATION

EXPERTISE

Two Events, One Goal

Bring together the companies that develop innovation with entrepreneurs and professionals from the manufacturing world that are looking for ready-to-use solutions and tangible and effective answers to improve the efficiency of their production systems.

Technology transfer experts, competence centres, innovation hubs, universities and research centres, institutions, organisations, trade associations and hubs become **partners of the A&T ecosystem**.

The Strength of the A&T Model

An **ecosystem** of local businesses, clusters and institutions.

An **Industrial Scientific Committee** of over 50 experts from the world of business and applied research.

Curated content and practical use cases for industry.

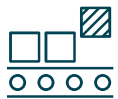

A&T is the place where technology
responds to the needs of businesses

Exhibition Focus Areas

AUTOMATION AND ROBOTICS

Mechatronic systems, industrial robots and collaborative solutions to enhance flexibility, precision, and safety within production processes.

INTRALOGISTICS

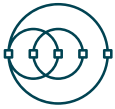

Streamline processes, anticipating supply chain needs, and addressing potential bottlenecks: how the companies of today satisfy the demands of the market.

TESTING AND METROLOGY

Measuring and testing: **reliability** as a tool for measuring competitiveness.

DIGITAL MANUFACTURING

The integration of **IT and OT for the benefit of the connected factory**: how companies are reorganising flows, resources and operations thanks to digital platforms and interoperable systems.

CONTROL SYSTEMS

Machine control, process control and quality control: **the core of industrial reliability**. Tools and platforms to improve precision, efficiency and diagnostic capacity of production.

ADDITIVE MANUFACTURING

When is the right time to invest in **additive manufacturing**? Meet leading exhibitors to evaluate the best solutions for your business.

AT A&T YOU MEET **LOCAL INDUSTRY**

A&T provides companies an expert and constructive environment to **present solutions, meet new customers and create valuable relationships.**

The event involves a professional audience made up of **entrepreneurs, managers, technical experts and production managers** from the main local industrial sectors.

Over 53% of visitors have a decision-making role

Who You Meet at A&T

SUPPLY CHAINS

Machinery and Subcontracting, Mechatronics, Metallurgy, Automotive, Aerospace, Plastics and Rubber, Food & Beverage, Packaging, Biomedical, Industrial Electronics.

ROLES

Business Owners & C-Level Executives, Operations and Production Managers, Plant Managers, Technical & Engineering Managers, R&D, Quality and Testing, Maintenance, IT and Industrial Systems.

THE EXHIBITION FOR THE MANUFACTURING INDUSTRY OF **THE NORTH-EAST** AND ITS SMES

A&T Vicenza is the platform dedicated to the manufacturing SMEs of the north-east that comprises an **exhibition area, 4 special projects** and technical content based on real case studies.

A project guided by a Scientific Committee representative of local industry and coordinated by Alberto Baban, to **respond to the real-life needs of local supply chains and manufacturers, innovators and investors in technology.**

Special Projects

Live demos and application case studies illustrate the logic of **Artificial Intelligence applied to manufacturing.**

In collaboration with: **SMACT Competence Center**

The programme dedicated to **businesses that invest in R&D and quality control** to improve their competitiveness.

High-tech startups, research and solutions to support the **digital transformation of industry.**

Technologies for the **integration of systems, mechatronics and computer vision** to enhance production efficiency.

In collaboration with: **AIdAM**

A&T TORINO 2027: INDUSTRY MEETS TO **CONSTRUCT THE FUTURE**

A&T Torino is the benchmark event for the industry of the north-west with a specific **focus on automotive and manufacturing supply chain of high technological intensity.**

4 special projects and 6 themed areas combine displays and application content, developed with the Scientific Committee led by Giorgia Garola, in collaboration with local businesses and stakeholders.

Special Projects

Artificial intelligence applied to production processes.

In collaboration with: **CIM Competence Center**

Additive manufacturing as a tool of innovation.

In collaboration with: **CIM Competence Center**

Measurement as a lever of competitiveness.

In collaboration with: **Accredia**

The area dedicated to manufacturing industry **startups.**
